**Oxygène Yachts presents the first AIR 77 at the 2013 Cannes Boat Show, a power catamaran with a decisively innovative style and design.**

Frédéric Sarfati on design and Raphaël Krepser on production both wanted to create a catamaran that would blend in with its surroundings while also offering a surprisingly spacious living area: 280 square metres of living space; the quest for maximum fluidity of movement, helped by the possibility of going directly from stern to bow in a straight line via the saloon (65 m<sup>2</sup> surface area), going through a 10m<sup>2</sup> doorway at the front of the deckhouse. This door opens upwards using an electrically-operated hydraulic system. The view here is all-encompassing with an uninterrupted line of sight.

The cockpits are located under the deckhouse and on the flybridge converted into a sun deck lounge.

There is nothing tawdry or ostentatious about the AIR 77. The designer has chosen discretion as his leitmotif, in respect for the natural aesthetics of the sea. Harmony with its environment is demonstrated by the lines of the hull: ultra simple but also extremely efficient on rough seas, and by the boat's low position on the water and its harmonious

glass/carbon superstructure.

This approach is also manifest in the choice of engine: just 2x260 HP, for an intentionally limited top speed of 20 knots. Fuel consumption is thus maintained at 42 l/h at 12 knots. Thanks to its two Ultrajet / Masterjet turbines, combined with low weight and a modest draught, the AIR 77 remains easy to manœuvre and is capable of accessing the most secluded bays; a rare promise for a unit of this size.

The first AIR 77 has been built as a 4 main double cabin and 2 double crew cabin version. Interior fittings and decoration are exclusively custom built, according to the wishes of the client.

The AIR 77 is set to be launched to the press and public at the

**Cannes Boat Show from 10th to 15th September 2013.**

280 square meters of living space

#### SPECIFICATIONS – Main characteristics:

Hull length: 23.5 metres / 77 feet

Beam: 10.40 metres / 34 feet

Draught: 0.8 metre

Weight: 35 tonnes

Fuel tank: 4 000 litres

Consumption: 42 l/h at 12 knots

Fresh water tank: 2 x 1 000 litres (and 200 l/h capacity desalinator)

Maximum speed: 20 knots

#### Engines:

2 x 260 HP Volvo and Ultrajet / Masterjet turbines

Possibility for engine power up to 2x600 HP

#### Construction materials:

Hulls: composite wood / epoxy / glass / carbon

Superstructures: glass / carbon

Canopy: anti-UV treated moulded Pevaiglas
